## Coming Soon ~ OrganMuse for Ipad

### Los Angeles, CA.....

It had to be! Two of the most innovative and sought-after products on the market would have to combine to create one of the ultimate mergings of technology and artform. The programming is taking place now and we should be in the testing phase very soon. The next gen-

eration of OrganMuse will offer the buyer the option of a system based on the All-In-One, a one piece unit, or a system based on the Ipad, which will include the Ipad joined to a 19" external monitor. Both systems will be plug and play, providing all the necessary hardware and software, and a few music files, to get you started. Stay tuned for further updates!
